PRODUCT DESCRIPTION

Cloud Paints Weather Guard is a high performance Acrylic Emulsion paint containing special fungicides. It is formulated to give long term protection to Exterior and all kinds of exposed surfaces especially prone to mould and algae attack. Cloud Paints Weather Guard is ideally suited to areas of humidity and tropical coastal conditions.

SURFACE PREPARATION: Surfaces must first be thoroughly cleaned free from all dust and Grease objects for a better result.

NEW SURFACE: Cloud Paints Weather Guard is advisable to prime the surface before using the top coat of Cloud Paints Weather Guard and must be sanded properly for an Absolute Acceptable finish.

PREVIOUSLY PAINTED SURFACE: The surface must be sanded properly for an Absolute Acceptable finish before using the top coat of Cloud Paints Weather Guard.

APPLICATION: STIR WELL BEFORE USE: Cloud Paints Weather Guard Emulsion can be applied by brush, roller or spray equipment. For first coat on porous surfaces, ease of application and for spray application paint can be thinned with 10 to 15% clean water. Avoid over-thinning.

CLEAN EQUIPMENT WITH CLEAN WATER.
DRYING TIME: Touch dry in 1 hour and can be recoated in 3-4 hours.

SPREADING CAPACITY: 10-12 square metres per litre on smooth, non porous surface. Spreading capacity will be substantially reduced on rough textured surfaces. or waterways.
